## SAFETY CHECKLIST

Name

Department

Date

DESCRIPTION	YES	NO	N/A
Portable power saw blade upper half is permanently guarded; the bottom half has a hinged guard.			
Radial arm and table saws have anti-kickback devices installed.			
Exposed saw teeth are covered by hoods or guards.			
Employees are trained in proper saw use and safety before working unsupervised.			
Safety devices are installed on all pneumatic nailers and staplers.			
Pneumatic tools are disconnected from air supplies when not in use.			
Safety glasses with side shields are worn at all times.			
Employees do not block off or remove any guard or safety device.
