Falls are a leading cause of injury and death in the workplace. Here are some tips to help keep you safe.

- Identify potential tripping and fall hazards before work starts.
- Look for fall hazards such as unprotected floor openings/edges, shafts, skylights, stairwells, and roof openings/edges.
- Inspect fall protection equipment for defects before use.
- Select and use fall protection equipment appropriate for the task.
- Secure and stabilize all ladders before climbing them.
- Stand on the top rung/step of a ladder.
- Handle rails when you go up or down stairs.
- Practice housekeeping. Keep cords, welding leads and air hoses out of walkways or adjacent work areas.

* Information provided by OSHA

Insurance coverage in all states other than Utah is provided by Advantage Workers Compensation Insurance Company, a wholly-owned subsidiary of Workers Compensation Fund, doing business as WCF Insurance
