**A strain is a twist, pull and/or tear of a muscle and/or tendon. Tendons are fibrous cords of tissue that attach muscles to bone.**

- Acute strains are caused by a direct blow to the body, over-stretching, or excessive muscle contraction.
- Chronic strains are the result of overuse – prolonged, repetitive movement – of muscles and tendons.
- Several factors can predispose you to muscle strains. These include muscle tightness, muscle imbalance, poor conditioning, muscle fatigue and insufficient warm-up.
- Be sure to stretch and warm-up your muscles before performing any physical activity to avoid muscle strains.

Insurance coverage in all states other than Utah is provided by Advantage Workers Compensation Insurance Company, a wholly owned subsidiary of WCF Mutual Insurance Company, doing business as WCF Insurance. Advantage is domiciled in Utah; NAIC number: 40517. Administrative office: P.O. Box 571918, Salt Lake City, UT 84157-1918.
